INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/ES 02/00580

I.	Basis	of the	report
----	-------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	scription, Pages		
	1-7	7	as originally filed	
	Cla	aims, Numbers		
	1-1	5	as originally filed	
	Dra	awings, Sheets		
	1/2	-2/2	as originally filed	
With regard to the language, all the elements marked above were available or furnished to this Auth language in which the international application was filed, unless otherwise indicated under this item.				
	The	ese elements were a	vailable or furnished to this Authority in the following language: , which is:	
			anslation furnished for the purposes of the international search (under Rule 23.1(b)).	
		the language of pul	plication of the international application (under Rule 48.3(b)).	
		the language of a tr Rule 55.2 and/or 55	anslation furnished for the purposes of interpotional purliminations of interpotional purliminations.	
3.	With inte	n regard to any nucl rnational preliminary	eotide and/or amino acid sequence disclosed in the international application; the examination was carried out on the basis of the sequence listing:	
		contained in the inte	ernational application in written form.	
		filed together with the	ne international application in computer readable form.	
		furnished subseque	ntly to this Authority in written form.	
			ntly to this Authority in computer readable form.	
			he subsequently furnished written sequence listing does not go beyond the disclosure upplication as filed has been furnished.	
		The statement that the listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.	
	The	amendments have r	esulted in the cancellation of:	
		the description,	pages:	
		the claims,	Nos.:	
		the drawings,	sheets:

Re Item V

ŧ:

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: DE-A-3716883

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document):

A device (46) for counting shots fired by a firearm (col.3, I.26-37 and claim 7), comprising a cartridge chamber containing a cartridge that can be expelled through an expulsion window.

An emission means transmits the counted signals to a microcomputer. However, the casings expelled, are sensed via the absence of background light or day light.

The subject-matter of claim 1 differs from this known device in that it comprises a first emission means designed to emit a continuous electromagnetic signal in such a manner that it is interrupted by a casing expelled from the cartridge chamber and corresponding to the fired cartridge.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as providing an apparatus that can count the fired shots more safely.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) because the solution is not known from the prior art. Other prior art devices e.g. use shock sensors.

Claims 2-11 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

The device claimed is industrially applicable.
